Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This communication is in response to applicant's amendment filed September 17, 2004. Claims 1-76 are pending in this case.

Response to Arguments

2. Applicant's arguments with respect to claims 1-76 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-76 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ginter (US 6,363,488) in view of Anderson et al (US 6,209,095).

5. Regarding claims 1, 12, 29, 43, 54, 62, 69 and 76 –

Ginter discloses a contract generation and administration system comprising: a single contract database comprising data obtained from multiple contract documents, said data organized into fields comprising: draft contract status, contract identifier, contract type, effective date, and expiration date; said system capable of generating reports based on said database, said reports obtainable through search of said fields; and said database being electively accessible by a plurality of users (e.g. col 1 ln 50 – col 2 ln 30).

Art Unit: 3621

6. Ginter does not disclose, but Anderson does, a field comprising obligation type, owner, status or due date (e.g. col 10 ln 40 – col 11 ln 10).

7. Regarding claims 2-8, 13-24, 30-39, 44-50, 55-59, 63-66, and 70-74 –

Ginter discloses the system wherein the contract documents are selected from the group consisting of. confidentiality contracts, software licenses, technology licenses, lease contracts and service contracts wherein said fields further comprise at least one of those selected from the group consisting of. obligation triggering event, royalty basis, invoice due date, payment due date, payment received date, payment schedule, tax, currency and invoice status, wherein said draft contract status field indicates whether a contract document is being reviewed and/or executed, wherein said obligation type field is substantially defined as training, meeting, shipping, payment, receipt of payment, reporting, start-up, secrecy, restricted use, maintenance or technology transfer, wherein a user's access to one or more parts of said database is based on contract type, user's job description, user's title, user's business unit, and/or user's authority level, herein said reports are selected from the group consisting of: accrued revenue, obligations due, obligations owed, customer history, open invoice, depreciation, corporate plan, stewardship, implementation plan, payments requiring invoice, anticipated payments, audit, pending contracts, active contracts and expiring contracts (e.g. col 2 ln 10-25)).

8. Regarding claims 9-11, 25-28, 40-42, 51-53, 60-61, and 67-68 –

Anderson discloses a system wherein said database further comprises standard contract forms or clauses; wherein said database further comprises standard invoice

Art Unit: 3621

forms or standard correspondence; wherein said database is capable of using its data to generate invoices and correspondence (col 1011 ln 10-50).

9. It would be obvious to one of ordinary skill in the art to combine the teachings of Gnter and Anderson in order to obtain a more user-friendly method of automated contract generation.

10. Examiner's note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may be applied as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Conclusion

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cristina Owen Sherr whose telephone number is 703-305-0625. The examiner can normally be reached on 8:30-5:00 Monday through Friday.
